Get More with New Night Color Series

New Night Color Camera with Smart Motion Detection

Camera with Night Color Technology enables images captured at very low lux levels to remain in color for clear identification. Equipped with Smart Motion Detection Technology and white-light LED, the new Night Color Series effectively reduce false alarms and offer accurate color rendering under different lighting conditions.

Smart Motion Detection

The New Night Color Series are added with Smart Motion Detection, which identifies and targets only human and vehicles.

Real-time alarm will be sent when a person or vehicle is detected in the scene, automatically filtering out leaves, light and other disturbing objects.

Suitable for Various Applications

Two types of Night Color cameras are available to adapt to different lighting scenarios and needs. For environments with complete darkness, the white-light LED model offers a full-color image regardless of lighting conditions.

For applications with with limited ambient light, where the absence of extra lighting is preferred, the non-LED models are a great option. We also offer complete form factors to cater to various application scenarios.

Resolution One Step Up

Night Color Cameras are available in 2MP, 4MP, and 5MP IP and HDCVI options to meet different scenarios and budget requirements.

Quick Setup and Maintenance

The IP Night Color series supports cloud upgrade. Both the SMD function and the firmware upgrade options only require one easy click per action.

IP Cameras

HNC3I249E-ASN1/36

4MP Full-color
Fixed-focal Dome Network Camera

1/2.7", 4MP@30fps, Night Color, 2.8mm Fixed Lens, WDR, Starlight, VCA, SMD+, PP, SD Slot

HNC3I349TM-ASN1/36

4MP Full-color Warm LED
Fixed-focal Eyeball AI Network Camera

1/2.7", 4MP@30fps, Night Color, 3.6mm Fixed Lens, WDR, Starlight, LED, VCA, SMD+, PP, SD Slot, Built-in mic
